

META & Dead Links Check

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

META & Dead Links Check (mdlc) is a Perl program that checks META tags and dead links. Now, it can only check local web pages. It can create 4 result files containing: List of checked links, List of dead links, List of Web links (not local links), and That you can view if your web site was indexed by a robot.
