MHF Media: Tell A Friend

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script will add the ability to let your visitors send an email to someone they know, telling them about your site! It uses Java to insert the form into your existing pages and not SSI. You can customize your message, keep track of stats on messages sent, keep a database of email addresses that have been used to create you own mailing list and you can customize the look of the form that is inserted onto your pages!
