

Midmart Download Center

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A little but complete script to allow unlimited files available for download with one form. It sends requested files to your visitors mailbox. Also, it saves the name, email and URL of visitors in a file so you can use it later to send them updates. Other futures are: built-in newsletter, send an email to all or specific visitors add/remove available files for download. Very easy installation.
