Email	{value_email}

MYSQL database to Microsoft SQL database converter software takes very few minutes to fully convert your complete database or selected particular table data records from MYSQL database to MS SQL database. This conversion tool supports all major MSSQL attributes and major versions of MYSQL database. This MYSQL to MSSQL database migration utility converts your database even if user wants MYSQL into MSSQL database. Application easily converts individual values of data tables or whole database from source DB to destination DB. Utility supports both types of configured settings like windows authentication mode and mixed mode. This converter program migrate all table data and other information related to primary or unique key constraints, indexes, necessary attributes and hierarchy of records of data tables.
