miniBB ("mini bulletin board") is a branded free web forum software script written in PHP for creating an online virtual community, with the concept of using a few very simple elements to the maximum effect, which also affects its top performance, suitable interface, and extreme security. It includes the most common functions for any kind of an Internet forum and could be extended with a lot of high quality original add-ons, incl. the Mobile layout for smartphones. The code runs with on W3C compatible CSS- and HTML-templates, SEO-optimized with an addition of mod\_rewrite incl. keywords-rich URLs, could support various databases (mySQL by default), translated in more than 40 languages. Integrates easily into your web site's layout and/or external membership. Qualified software support and service are provided straight by its author. The Compiler tool allows to embed the functions related to your forum only, by a click - NOW, you can build \*your own\* forum in a minute!..
