<b>Email</b>	{value_email}

Our MLM software can create an unlimited number of membership programs and or stores, any or all of which can also be affiliate programs, and all of them using up to 5 tiers AKA levels (MLM) and or powerlines (X-up), and all of them running off one domain and database, so all the members can create one downline within the network. They also maintain one profile, username, password, and login area. In other words, you can create an ENTIRE NETWORK of programs (each with their own unique product or service, and each unique with their own compensation plan, different from the rest) with just one installation of our software. If desired, multiple domains can be set up and tied to the same database, to create the desired branding per program.
