Mobile Site Builder

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The resulting website will be optimised on all major mobile devices (iPhone, Android phones, Windows Mobile, Blackberry etc). It works like a CMS where you can create your pages, define your pages title and content, organise them into categories and more. It also support items that can be your products or your portfolio for example, and that can display in a page to showcase your work. This app also integrate a way for you to display your Facebook page feed directly into your mobile website, and also an ability to integrate YouTube videos channels. Features Include: - A CMS to create your mobile website without touching any code - Create an unlimited number of pages - Define your pages title and content (HTML tags supported) - Supports categories to organise your pages and to layout your site - Supports items display in order to showcase your work or products - Contact page to enable visitors to send you a message - And more...
