Mono Scheduler is a powerful and easy to use ASP.NET component that allows developers to add advanced calendaring and scheduling functionality to their applications. It easily integrates into existing Web applications, offering powerful collaboration features for groupware solutions. Mono Scheduler has been designed for use with Visual Studio .NET, but can also be used from other IDEs, even Notepad! It can be used to manage events, meetings, deadlines, schedules, tasks, announcements, etc. Events can be published to the target audience or sent by e-mail.
