

MouseOver Pop-Up Windows

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This JavaScript demonstrates the onMouseOver and onMouseOut attributes. When a person places their mouse over the link a new window will open up on top of the current browser window. When the mouse pointer is moved off the link the window will close automatically. All the script for the new window is contained in the previous page, so it loads rather quickly.
