MP3SPI adds MP3 audio format support to the Java Platform (J2SE). Release 1.9 provides new features allowing to get audio properties such as bitrate, channels, frequency, duration and song comments such as title, album, artist, genre, track ... (extracted from ID3v1/v2 tags or ICY shoutcast meta-data). Developers could find out sample code in the updated documents section. This new release also provides a real time equalizer.
