MPCS - Multi-Page Comment System

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

MPCS is an advanced visitor comment system, with emoticons and BB code support. MPCS allows for many comment sheets to be created and used on separate pages of your website (or for other uses). MPCS also includes a CAPTCHA system to validate a commenter as human, thus cutting out bot spam. Not only this but a visitor is limited to one post per comment sheet. The admin can also request that all posted comments are verified before they appear to the public! MPCS is also fully skin-able, everything is generated from a style sheet provided by a database. MPCS is easy to install, secure and free!
