Multi-Vendor is an extended version of CS-Cart (http://www.cs-cart.com) that enables you to create an eBay/Amazon-like marketplace where multiple vendors manage their sales through one common webstore. It's a perfect solution for online stores with multiple independent vendors and virtual shopping malls with many separate departments. Multi-Vendor incorporates all the features of CS-Cart and provides the multi-vendor functionality allowing different vendors to sell and manage their products in a common storefront. Each vendor has its own admin panel where he/she can manage the products, orders, and customers. Multi-Vendor has a powerful privilege system that allows you to grant or limit access for vendors to any CS-Cart functionality. The main administrator can also moderate vendor changes. TRY MULTI-VENDOR FREE FOR 30 DAYS WITHOUT FUNCTIONALITY RESTRICTIONS.
