Online multiple calendars solution for businesses, community groups, clubs or schools, that need more than one web based calendar. (Unlimited number of calendars can be built via admin menu.) Internet or intranet visitors can group & merge a selection of calendars (if not marked private) for a customized view, search for words or expressions, link to RSS feeds for automatic updates and more! Two tier logins allow admin to add events to multiple calendars at once and to be notified when the events are approved or deleted. Individual calendar managers can be given their own username and password to their publicly accessible or private calendars. From their menu driven area, they can control their own data, get emails when events have been externally suggested, decide on categories & text colors, upload images, etc. All this and more! Includes source code, support & manuals. One time price, no extra or monthly fees.
