My Classifieds

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

My Classifieds is a Perl CGI implementation of online classifieds, similar to other classifieds or auction sites. It displays all aspects of the classifieds and creates all of the files for you. Admin just needs to specify the categories, colors, template, and a few other site-specific variables and preferences. This is done through an intuitive manage script. The script supports email and deletion/modification of ads by users, as well as searching ads, and auto-delete after an admin-specified number of days. The admin can also delete or edit ads, delete or ban users, and change users passwords. My Classifieds also has an intuitive language module that is easy to edit. Already supported are English, Spanish, Puerto Rican Spanish, Norwegian, Portuguese, Danish, and Dutch.
