

MyKazaam Mail File Downloading Utility

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows you to offer files to be downloaded from your website only by email. This eliminates fraudulent email addresses when your user submits a request to download a file. When your visitor submits the required information, the server replies with the file that they wanted to download, attached in the reply message. Allows you to interface the script to handle numerous files. Demo it at our download site.
