

# MyKazaam Notes Manager

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script is a note database utilizing MySQL. Use it for client status reports or just to keep track of your client files. Enter in your file number and see all of the notes entered by whomever has worked on the project. Then, enter your notes into the system. This works great for "workorder" systems or when used with MyKazaam Message Confirmed. Your users can log in to your site and instantly see the progress being made on their file without hasseling you about it.
