myRepono is an online website backup service which enables you to securely backup your WordPress web site files and mySQL database tables using an online and web-based management system. The myRepono online website backup service allows you to automate the process of backing up your entire WordPress web site and database, including all post, comments and user data, and your WordPress PHP, template and plugin files. We provide an easy-to-install WordPress plugin which automates the myRepono API set-up and configuration process, enabling you to setup automated and remote website backups in a matter of minutes. Comprehensive backup management and restoration tools are provided via myRepono.com, giving you an independent backup management and restoration system if your WordPress installation is unavailable.
