

MySQL and C#

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you've installed it, launch your C# compiler/IDE. Next, open the project you want to add MySQL support to. Now, go to the Project menu => Add Reference. Under the .NET tab look for MySQL.Data under "Component Name." Click "OK" and were are ready to start coding.
