

Navier

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Navier adds a checkbox near every link on a web page so that a user can select multiple hyperlinks to be opened simultaneously. The selected links are opened in new windows or all stocked up in a single page, which is much more convenient when the web sites contain relevant content in the same format, as in catalogs. The Navier's way to open link makes sense, saves time and is incredibly convenient. Get your copy now!
