Email   {value_email}

NB-safecolor is a unique color tool. It allows you to choose the right combination of colors for a webpage, either by choosing from a websafe/named colorpalette, pre-defined colorsets or by specifying RGB/HEX-values. Easy copy and paste of CSS-code with the color layout to your editor. Features a user-friendly interface to try different color combination, switch between colors, undo color choice, swap color coding between items, and much more.
