These Dreamweaver Extensions are centered around managing files within a static Dreamweaver site. They are: Neonix Site Tools Pro - search for files within a site using comma-delimited wildcard search strings and then process the files with a variety of actions - upload, check-in, make writable and more Neonix Remove Orphans - delete orphaned files while filtering the orphan list for those files that are known not to be orphans Neonix Directory List Links - instantly insert links to files within a given directory with a variety of formatting options
