Neonix TD Rollover is a Dreamweaver Extension that lets you apply rollovers to table cells. Useful when you want to create a toolbar where each link is in a table cell and you want to have the table cell's background color change when you mouseover it. You can create two kinds of rollovers- an "Instant Rollover", where the table cell background is swapped for the rollover color or a "Fade Rollover", where the table cell fades into the rollover color. No need to mess around with HTML, JavaScript or CSS.... Neonix TD Rollover does everything for you! Visit the home page for this product to view screen captures and review additional information.
