

# Net Imaging

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

This is an applet that allows image processing within the browser: crop, resize, rotate, adjust brightness, contrast. The resulting image can be saved on the server in JPEG format. The developer can define output image constraints: aspect ratio, maximum or fixed dimensions. Implementation: Java applet (95KB) compatible with JDK 1.4 or later. Tested in the most popular browsers: Internet Explorer, Firefox, Safari, Chrome. The download package includes a documentation for developers and examples in PHP, ASP, ASP.NET, JSP.
