The Organisation Chart Component is a charting component specifically designed for building organisation charts. Written in C# it provides the developer many features to make creating an organisation chart a quick and pain free process. The component software is licensed on a "per developer basis" and is run-time and royalty free. We operate a 30 day "no questions asked" refund policy. Features of The Organisation Chart Component * Chart from XML Data * Chart from relational Data * Supports Templates * Stack lower level child nodes to allow the display of "deep" charts * Navigation buttons allow end-users to traverse up and down the chart * Draw charts with assistants and dotted line reporting * Single assembly deployment : No graphics or script files to install.
