Mobile Number {value_mobile_number}

Email {value_email}

Network Eagle is a network monitoring software. Create categorized task lists on a "set and forget" basis. Network Eagle can ping server, monitor TCP port, check HTTP URL (with HTTP auth.), test FTP link, check disk space usage, execute external command check, check databases via ODBC, monitor MS SQL server via native interface and more. Write your own script checks using JS and VBS. A variety of useful wizards are available.
