The Nevron 3DChart ActiveX component can display 2D and 3D business, scientific and presentation charts. It supports all basic charting types with lots of different style and logic variations. All chart type combinations can be simultaneously displayed. 3DChart has four vertical axes plus one category and serie axis. It has an integrated legend. The data can be extracted from an ADO data source. Fill Effects and materials can be applied on all chart elements including individual data points and texts.
