

News Management System

| | |
|-----------------------|------------------------|
| Address | {value_address} |
| Contact Person | {value_contact_person} |
| Mobile Number | {value_mobile_number} |
| Email | {value_email} |

Create a system to display current news from a list of headlines. Uses the scripting.fileSystemObject instead of a database as an information source. This system uses ASP to read and write info into a text file and then format it into an html display. Updating this page is as easy as clicking the add your news button.
