Newsletter Dispenser Server is a newsletter software created in pure Java. This robust newsletter server is easy to implement on your site and manage and maintain newsletters on your site. Newsletter Dispenser Server is the most flexible and reliable Java newsletter server on the market. This newsletter software benefits from recovery control to ensure that the newsletter is sent to all the subscribers, even if there is a hardware failure in middle of the processing. This newsletter software allows you to easily manage and maintain subscribers. Newsletter Dispenser also has automatic e-mail bounce control and publisher security to allow for different publishers to publish their own newsletters.
