newsurl

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

This script searches in a particular newsgroup for postings and extracts posted urls. newsurl prints a list containing author, subject and posted urls for each posting containing urls. You can specify filters for the subject and/or the author. So you can minimize the download. Optionally a html-output can be generated.
