Nitobi Fisheye is an Ajax-powered toolbar component featuring the fisheye magnification effect, similar to Apple OX toolbar. Using a fisheye toolbar can significantly improve the user experience by allowing users to select from long lists without sacrificing screen real estate. Use Nitobi Fisheye to create and customize your fisheye toolbar with minimal effort. Nitobi Fisheye is available as part of the Nitobi Complete UI suite, <http://www.nitobi.com/products/completeui/>
