NumericTTS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class can be used to generate audio to spell numbers using different voices and idioms. It generates a audio files in the WAVE format by concatenation audio samples that spell the digits of a number. The digit audio samples are available for male and female voices in English and Arabic. The resulting audio sample can be stored in a file or served as the current script output.
