

# obieINBOX

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

It is a "Form to email" scripts, but ObieINBOX does not send the email immediately after the form has submitted, it stores all email (that submitted by the form) in a database. With control panel, you can navigate the "virtual" email inbox like the Yahoo Mail: view, reply, forward, flag, delete each message, and you can empty your obieINBOX with one link. New in 2nd version: Deleting group of messages, unread and flagged emails viewing, new emails alert module, notepad and fixed some bugs.
