

On-Screen Virtual Keyboard - kentormb

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A plugin which uses jQuery to display a virtual keyboard on screen when the user clicks an input field. It's an accessibility keyboard and could be used to enhance the usability of your site. The keystrokes are not traced by keyloggers. Virtual Keyboard enables you to easily choose between 15 languages and type online without installing these keyboard languages. You can use your computer mouse to type letters with this virtual keyboard. You can drag it around the page, to put it in a suitable place.
