

Online Appointment Scheduling

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The online appointment planner is a tool based on PHP and MySQL that can be used on the Web sites of companies for booking appointments online. The script allows customers to reserve an appointment with a staff member via the Company's homepage. Appointment and customer data can be edited in the administration area by the operator. The scripts allows you to create an arbitrary number of appointment areas. Users and operators can be assigned to one or all appointment areas.
