Online Exam using ASP & XML

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This article presents an online exam system that pulls its data from an xml file on the server. The question list for the user is sent to the browser via Microsoft's XMLHTTP Object. Using this same object, the questions are retrieved from the server and displayed on the page whenever the user requests a question.
