Online Invoicing System

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Online Invoicing System is a web application written in PHP that can be used for simple invoicing needs. Most of the code of Invoicing was automatically generated by AppGini. To use Simple Invoicing, define your clients, then go to the Invoices page to add a new invoice, define its details, and voila! Your new invoice is ready for printing.
