This Project is based on the Open Source Project OScommerce. SystemsManager Technologies maintains and supports this project. With this Virtual Mall System, you retain all of the functionality built into the World Class OScommerce Project, which has behind it hundreds of developers. Since our project follows each MileStone (pre-MS, MS1, MS2), you are assured that contributions found at the OScommerce site that function with MS2 will also function with the oscMall System(currently MS2). As with the OScommerce Project, the oscMall System Project also carries the GPL Licence. With full support via our forums, you will have a multi-store web site in minimal time.
