

# PassHack Killer

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script, when properly installed, will log and track any failed authentication attempts for your members area(s). When the failed number of attempts coming from one certain IP exceeds a limit you set, the script will automatically block that IP from accessing your entire site. This will also effectively block any person trying to brute-force their way into your members area(s). Whenever a block is placed, you will be notified by e-mail so you can take the appropriate action, e.g. contact the offenders ISP. The blocking system is totally automated, provided you have set up the correct .htaccess entries.
