<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Password Pro is a password protection program written in JavaScript that uses an encryption mechanism, to hide the password from the source code. You can use Password Pro to protect folders or files. The pages name must be the same with your password, and the script is case sensitive and can only recognize numbers and letters.
