Password Protected Categories is a flexible and easy-to-use WordPress plugin. It lets you lock down entire categories of blog posts or other types of content. Do you want to create private areas within a WordPress blog? Perhaps you need a private portfolio in WordPress containing hidden case studies? Maybe your e-commerce site needs hidden categories containing products that are restricted to specific customers? When you password protect a category, all its contents are automatically protected with the same password so your users only have to login once. PLUGIN FEATURES - Works with any post type or custom post type including WordPress posts, portfolios, testimonials, case studies, documents, e-commerce products and events - 2 category protection options: password protected or private categories - Supports multiple passwords per category - Customizable category login page - Developed and supported by UK WordPress agency Barn2 Media, established 2009
