

PasteBox

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

PasteBox is a basic pastebin. It is written in PHP, works with PHP 5. Provides RSS feeds of latest entries, syntax highlighting using GeSHi and clean URLs. Uses PDP-PDO for database flexibility. Runs without setup on many machines (must have PHP 5, sqlite3 (for default setup), .htaccess enabled).
