

PasteBox

Address {value_address}

Contact Person{value_contact_person}Mobile Number{value_mobile_number}

Email {value_email}

PasteBox is a basic pastebin. It is written in PHP, works with PHP 5. Provides RSS feeds of latest entries, syntax highlighting using GeSHi and clean URLs. Uses PDP-PDO for database flexibility. Runs without setup on many machines (must have PHP 5, sqlite3 (for default setup), .htaccess enabled).
