Keeping all the great features of PayPal in mind we have designed a software package that allows you to easily install and manage an efficient Online Payment service. Check out the features section for more info. FEATURES: * Works just like the popular PayPal payment processing network but with added features. * Allows you to integrate membership web sites into your payment system. Other webmasters will download a script from you (included) allowing for member name:password activation and cancellation. * Fully supports automated recurring billing * Allows you to completely customize all colors and logos, for a completely brandable site. * Allows you to use the system in a manual mode or automatically processing transactions. * Easily ban/block users/IP's * Same email verification process as PayPal for the utmost security * Designed for growth, allowing you to place different parts of the program on different servers with near instant synchronization. * Will support more than 100,000 users. If you grow into more users than that, an upgrade is available supporting up to 1,000,000 users for an additional fee, again allowing you to grow your business. * Allows for more customer funding options than the competitors. You can even allow customers to fund their account WITH the competitors (PayPal.com,eCount.com,FirePay.com etc.). Funding via 900 numbers and more. * Comes with instructions on how to setup the appropriate merchant account(s) for the systems to work. * Comes with important information about ACH and how to use the ACH network. * Complete support and upgrades for 1 full year.
