

Paypal Pro PHP 1.1 - for Paypal Website Payments Pro

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Paypal Website Payments Pro is a new, easy way of accepting credit cards. No gateway or merchant account needed. This script allows you to easily connect to the Paypal Pro servers and process credit cards without the headaches of dealing with the complicated integration. Start accepting online payments as soon as possible. We have done the work for you: - No complicated SDK and integration with Paypal APIs. - Customizable for your own website (we have made it very easy to modify only 1 or 2 config files to completely change the look and feel for your site) - Built in UPS and Flat rate shipping calculator - Built in Mini shopping cart (easy to use) - In case you do not already have one - Payment options by credit card (visa, mc, amex, disc) or by paypal express - Automatic Email order confirmation to both you and customer - Very clear installation instructions - Drop in and ready to go in minutes - Online Demo available to see it in action - Forum Board to get your questions answered
