WebGantt.NET is a .NET component for use with ASP.NET or any .NET-enabled language to create a pure HTML Gantt project chart. Data is fed and chart features are set through a series of methods and propertyes. WebGantt.NET is designed to be independent of any database - you populate the data yourself, so you can use it with SQL Server, Access, Oracle, etc. When you download WebGantt.NET, the product contains full functionality but is limited to five (5) tasks. By registering the product and obtaining a key, you can chart unlimited tasks. A comprehensive help file is provided.
