pdf-DocPro is a ideal supplementary tool to people already using any PDF printer driver. With pdf-DocPro you are able to set all PDF document properties with some few clicks. Define settings, security permissions, encryption levels and printing options. You want to add a 128-bit encryption or a User password and/or a Master password? Show the document in Acrobat Reader with Thumbnails or without them? What magnification you want to present? Which page layout? You want to present your document in Acrobat Reader like a Powerpoint presentation? Then Acrobat Reader should hide menu bars, tool bars, window controls and ought to open in full screen mode. No problem with pdf-DocPro.
