Perl Builder is a complete, integrated development environment (IDE) for Perl. Whether you are an experienced Perl developer or a non-programmer who needs to create Perl CGI scripts, Perl Builder's visual tools are guaranteed to dramatically improve your productivity. Main features include: The CGI Wizard allows anyone to create sophisticated CGI scripts without programming, The Integrated Editor/Debugger allows you to immediately test and debug your code in an environment which is reminiscent of the top visual development tools from Microsoft and Borland, Desktop Testing/CGI Simulation, Fully Windowed (GUI) environment, and more.
