Mobile Number	{value_mobile_number}
Email	{value_email}

This script is mostly 4 *nix machines unless u have PERL installed on your windows box. What this little script does is takes all mp3's in a specified directory and adds them to a m3u playlist for winamp good for local lans if you have your mp3's stored on a nix machine just change the path to match your MP3 directory and the path to your http server
