

# Perl Metrics

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This program is intended to help perl programmers write better code by becoming more aware of their coding style. In particular, one would like to know the code-to-comment ratio, the average number of lines per subroutine, the longest subroutine, etc.
