Perl Studio is an integrated development environment for Perl, providing comprehensive and easy-to-use solution for editing, debugging and deploying Perl based applications. This advanced Perl editor enables developers to code faster and more efficiently with many convenient features such as: Built-in HTTP server and internal web browser for testing CGI/Perl scripts directly, automatic code completion and parameter hints for Perl, and HTML objects and built-in FTP client for directly editing files from remote servers. Other features include: Configurable multi-language syntax highlighting for Perl, SQL, XML, HTML, Javascript, YAML, PHP, Python and Ruby, UTF8 / UTF16 encodings, search/replace with regular expressions, find in files, syntax checking for Perl code, visual file comparison utility, code libraries for Perl, HTML and JavaScript, templates, project management, parentheses matching, file explorer, custom color schemes, modern user interface with intuitive design and more...
